

Dark Assembly Bridge - Assembly Guide

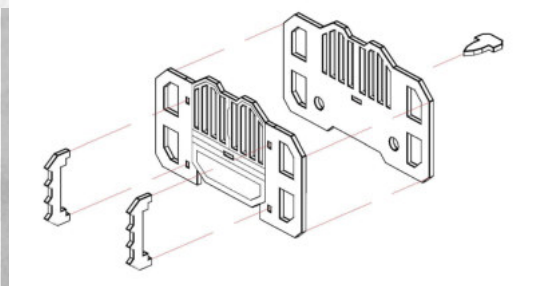

Parts may need careful removal from the MDF boards with a scalpel, and light sanding of any rough edges. We recommend testing assembling sections before permanently gluing together.

Component Support Placement

NOTE: These pieces provide additional support for some modular components from the Dark Assembly Range and therefore should be left un-glued and only used in configurations that require the additional support.

Example Configuration

The individual components may be glued in a fixed configuration, or alternatively can be magnetized with 5x2mm magnets using the provided holes.
